

DRAFT OMB SUPPORTING STATEMENT FOR
NRC FORM 536, "OPERATOR LICENSING EXAMINATION DATA"

(OMB Clearance No. 3150-0131)
Extension Request

Description of the Information Collection

The NRC annually requests all commercial power reactor licensees and applicants for an operating license to voluntarily send to the NRC: (1) their projected number of candidates for operator licensing initial examinations, (2) the estimated dates of the examinations, (3) information on whether the examinations will be facility developed or NRC developed, and (4) the estimated number of individuals that will participate in the Generic Fundamentals Examination (GFE) for that calendar year. NRC utilizes an official form, NRC Form 536, for the voluntary reporting of this operator licensing examination data.

A. JUSTIFICATION

1. Need for and Practical Utility of the Collection of Information.

The Code of Federal Regulations, 10 CFR 50.54, requires that all manipulations of controls of any facility be performed only by a licensed reactor operator, licensed senior reactor operator or a trainee under the direct supervision of a licensed reactor operator or a licensed senior reactor operator. The licensing of reactor operators or senior reactor operators is performed by the NRC in accordance with the requirements of 10 CFR Part 55. In order to meet the needs of the nuclear industry for licensed reactor operators and senior reactor operators, NRC requests all commercial power facilities to submit their projected (estimated) number of candidates for reactor operator and senior reactor operator examinations, the proposed date for examinations for the next calendar year and each of three successive calendar years. NRC Form 536 also requests the estimated number of individuals that will participate in the GFE.

2. Agency Use of Information.

This information is used by the NRC to plan budgets and resources in regard to operator examination development and scheduling to meet the needs of the nuclear industry.

3. Reduction of Burden Through Information Technology.

There are no legal obstacles to reducing the burden associated with this information collection. The NRC encourages respondents to use information technology when it would be beneficial to them. NRC issued a regulation on October 10, 2003 (68 FR 58791), consistent with the Government Paperwork Elimination Act, which allows its licensees, vendors, applicants, and members of the public the option to make submissions electronically via CD-ROM, e-mail, special Web-based interface, or other means. It is estimated that approximately 0% of the potential responses are filed electronically."

4. Effort to Identify Duplication and Use Similar Information.

This information does not duplicate or overlap other information collections made by the NRC or other government agencies. The Information Requirements Control Automation System was searched and no duplication was found. This information is available only from the facility licensees.

5. Effort to Reduce Small Business Burden.

This information collection does not affect any small businesses.

6. Consequences to Federal Program or Policy Activities if the Collection is Not Conducted or is Conducted Less Frequently.

This information must be collected and reviewed annually in order to accurately forecast examination needs.

7. Circumstances which Justify Variation from OMB Guidelines.

This information collection does not vary from OMB guidelines.

8. Consultations Outside the NRC.

An opportunity to comment on the information collection requirements for this clearance package has been published in the Federal Register.

9. Payment or Gift to Respondents.

Not applicable.

10. Confidentiality of Information.

No information normally considered confidential is requested.

11. Justification for Sensitive Questions.

This information collection does not involve sensitive or private information.

12. Estimated Annualized Industry Burden and Burden Hour Cost.

Approximately 80 facility organizations are requested to submit information on NRC Form 536 annually. This number accounts for multiple unit plants and similar/dissimilar units at a single site.

The estimated annual burden per facility is 1 hour. This is based on previous requirements for similar material submitted by facility personnel. The total annual industry burden is 80 hours (1 hour/respondent X 80 respondents).

The estimated annual cost to the facilities to respond to the collection is \$12,560 (80 X \$157/hour).

13. Estimate of Other Additional Costs.

NRC has determined that the storage and equipment costs per foot are approximately \$45. The quantity of records to be maintained is roughly proportional to the recordkeeping burden. Based on the number of pages maintained for a typical clearance, the records storage cost has been determined to be equal to .0004 of the recordkeeping burden cost. Although the NRC does not require licensees to retain the NRC Form 536, based on the assumption that they will retain it, the storage cost for this clearance is estimated to be \$5.02 (80 hours X \$157 X .0004).

14. Estimated Annualized Cost to the Federal Government.

Approximately 1 hour per respondent (80) is spent by NRC personnel. The information gathered by NRC Form 536 is reduced to a standardized format and then used for planning budgets and resources for NRC operator licensing functions. The estimated annual cost to the Federal government in connection with NRC Form 536 is \$12,560 (80 x \$157/hour). This cost is fully recovered through fee assessments to NRC licensees pursuant to 10 CFR Parts 170 and/or 171.

15. Reasons for Change in Burden or Cost.

The overall burden estimate for NRC Form 536 has remained the same. There has been an increase in the overall cost as a result of an increase in the rate from \$150 per hour to \$157 per hour in accordance with Part 170.

16. Publication for Statistical Use.

This information is not published for statistical use.

17. Reasons for Not Displaying the Expiration Date.

The expiration date is displayed.

18. Exceptions to the Certification Statement.

None.

B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS

Statistical methods are not used in this information collection.
